

## Environmental Policy

Storm Lighting is an organisation that recognizes the need to be environmentally aware. We make every effort to be mindful of the impact our events may potentially have on the environment. This vision is also applied to our everyday hires, sales and general day to day running of the business.

The company will act in accordance with environmental legislation and is dedicated to continually follow this practice.

At Storm Lighting we intend to encourage others to apply their own green policy, and also provide an ongoing awareness about protecting the environment. We believe to stay informed, concerned and committed to these initiatives paves the path for a greener future.

### Our Commitments

- Encourage and promote environmental management policies and practices throughout the company
- Increase awareness of environmental responsibilities among Storm Lighting employees, contractors, clients and suppliers. We believe that industry collaboration is important to driving sustainability in the Events sector; this is achieved by the support of research and promotion of policies.
- We commit to continually improve and monitor environmental performance through awareness and training.
- Reduce waste by minimising consumption
- Using effective waste recycling programmes for every aspect of our business.
- Prevent all types of pollution and make certain wherever possible that all preventative measures have been taken.
- Support the use of recycled materials on a daily basis.
- Avoid the use of environmentally damaging substances and resources.
- Invest in energy efficient technology.
- Participate in the Carbon Neutral Programme and try to wherever possible use transport companies that do the same.
- Encourage the minimisation of damaging environmental impact to transport staff and apply an environmentally friendly attitude to the use and provision of company vehicles
- Ensure our operations have minimal effect on the local community, by acting in a considerate and responsible manner.
- Continuously monitor and review Storm Lighting's environmental policy and practices.

Storm Lighting's Management team are responsible for implementing this policy within the company. They will do everything they can to ensure that possible hazards and threats to the environment are identified and dealt with in a suitable and effective manner. Employees will be given all necessary documentation, training and resources to help them fulfil the requirements of this policy.

An annual review will take place to assess the operation and procedures of this policy, however any environmental issues throughout the year will be dealt with as and when they arise.
